**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 13-14, and 16-17, are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshimura et al in view of Tsukasa (JP406319076).

Yoshimura et al discloses an image recording/reproducing apparatus that shows substantially the same limitations recited in claims 13, and 16, including the feature of reproducing data from a medium on which multi-frame data and data of a number of frames comprising the multi-frame data are recorded (See Yoshimura et al's Figure 8, component 116), the feature of processing the multi-frame data on the basis of the data of the number of frames reproduced in the reproducing step wherein the multi-frame data represents a multi-frame composed of plural rectangular frames each being of the same size as specified in the present claims 13, and 16. (See Yoshimura et al's Figure 12, and column 10, lines 63-68).

Yoshimura et al fails to specifically disclose the feature of enlarging one of the plurality of pictures as specified in the present claims 13, and 16.

Tsukasa discloses a multi-picture display apparatus which includes the capability of enlarging one of the plurality of reproduced/displayed pictures as specified in the present claims 13, 16. (See the paragraph entitled "Constitution" shown in Tsukasa).

It would have been obvious to one skilled in the art to modify the Yoshimura et al's apparatus wherein the reproducing/displaying means provided thereof would incorporate the capability of enlarging one of the plurality of reproduced/displayed pictures in the same manner as shown by Tsukasa. The motivation being to increase the size of the picture so as to have a better view of the displayed picture as suggested by Tsukasa.

With regard to claims 14, and 17, the feature of the medium being a disk-recording medium as specified thereof is present in the proposed combination of Yoshimura et al and Tsukasa. (See Yoshimura et al's Figure 8, component 116).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 15, and 18, are rejected under 35 U.S.C. 103(a) as being unpatentable over Yoshimura et al and Tsukasa as applied to claims 13-14, and 16-17 above, and further in view of Official Notice.

The proposed combination of Yoshimura et al and Tsukasa indicated above discloses an image recording/reproducing apparatus that shows substantially the same limitations recited in claims 15, and 18, including the feature of recording multi-frame data on a recording medium as specified in the present claims 15, 18. (See Yoshimura et al's Figure 8, component 116).

The proposed combination fails to specifically disclose the feature of the multi-frame data as being compressed data as specified in the present claims 15, and 18.

Examiner takes Official Notice in that it is notoriously well known in the video recording/reproducing art to compressed image data before recording the same on the recording medium as specified in the present claims 15, and 18.

It would have been obvious to one skilled in the art to modify the proposed combination's recording/reproducing apparatus wherein the recording/reproducing means provided thereof (See Yoshimura et al's Figure 8, component 140, 142, 116) would incorporate the capability of a compressing means for the purpose of compressing the image data before recording the same on the recording medium in the same conventional manner as is well known in the video recording art. Examiner has taken Official Notice. The motivation being to increase the recoding density of the recording medium as suggested in the prior art.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 19-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsukasa (JP406319076).

Tsukasa discloses an image pickup apparatus that shows all the limitations recited in claim 19, including the feature of memory which stores a number of reduced

images (See Tsukasa's Figure 3, components 13, and 17), the feature of selecting one of the reduced images and enlarging the one selected reduced picture and displaying the enlarged image as specified in the present claim 19. (See Tsukasa's Figure 3, components 2b, and 2d, and the paragraph entitled "Constitution").

With regard to claim 20, the feature of the pictures having the same size as specified thereof would be present in Tsukasa. (See Tsukasa's Figures 1, 2, 5, and 6).

### ***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
